Reviews:

Muñoz García Arturo

Personally GitHub is a great tool I had used before, but not like this time, as I had not worked so much with branches. But thanks to this project I learned more and as I have double account I also learned the pull request I knew, but I did not know well what I was doing. But with this project I learned more from this great tool, as well as remembering the use of git and github.

Brito Serrano Miguel Ángel

It's a very useful tool but I haven't used it much, my teammate was the one who uploaded most of the advances we made to the project, if I like it since it updates the changes in a quick way, What I've always had a hard time doing is pull request. But in general it is a great tool to work on a collaborative project. I just need to improve the use of the tool to be able to contribute the same as the whole team.
